Dear Friends

May I welcome you to the web page of Bangladesh Women Chamber of Commerce & Industry, a platform of energy, innovation, opportunity and dreams for the business women of Bangladesh.

BWCCI is the first ever Chamber of Commerce in Bangladesh, created solely with the aim of achieving economic empowerment of women of Bangladesh. The dream began to become a reality through the leadership of a very special woman, Selima Ahmad, the founder President of the Chamber.

Today, we have crossed our first decade and can proudly say that we have achieved far more than what we had dreamt possible. Today we have gained recognition in Bangladesh and all over the globe as the most effective voice for the economic strength of women of Bangladesh. Today, by leveraging our collective strength of 3000 women members from the urban and rural areas of Bangladesh, we have succeeded in holding the reins that decide our future, the future of our children and our country.

In our bold journey forward we have achieved many milestones that indicate some of our many achievements.

With our continuous trainings and workshops on product development, market assessment and access, entrepreneurship, our campaigns for removing social barriers, for easy access to finance for women, our advocacy for policy reforms and fight against corruption, we can proudly say that Bangladeshi women now have a voice in their homes, in the education of their children, in society, in economic and public life.

So join us and become part of our continuous activities and lively sisterhood. We have proved that we can do it.
Let us join hands and reach towards equality and peace and prosperity for Bangladesh!

Sangita Ahmed
Former President
2012
